

Overview

The Albutt Dozer blade utilizes high strength steel (Domex) to provide a high strength attachment for moving and levelling material. Available with hydraulic or manual angling, the 2' high blade is suitable for use on tractor linkage. As standard we offer 2 widths, 6' and 8'4" with the blade being able to be angled 25 degrees either way. A boron 500 wear edge is fitted as standard.

Features

- Domex high tensile steel back
- Boron 500 wear edge
- Manual or hydraulic angling
- 25 degree angle
- 6' or 8'4" wide
