

Overview

The Albutt Folding Fork is designed to maximise the potential of your clamp machine. By featuring wings that close during road transport, the Folding Fork can spread its wings for clamp use and such considerably increase its capacity. A market leading specification includes a 200x100mm tine holder, 1650mm genuine Hardox base tines, a shock protecting hydraulic accumulator and use of Domex and Hardox in key stress areas. Trusted the world over, the Fork is regularly sent abroad and used by major OEM's on their demonstration machines.
