

Overview

The Albutt Bag Filling Bucket is the ultimate time saving attachment for use in busy yards. It allows the quick fill of tote bags with heavy free flowing material such as sand, aggregate, gravel etc. To be used with any Telehandler or loader, trailers and vans can also be filled with precise control. The design means that when bags are filled they can be accurately stacked or loaded onto trailers and trucks.

Features

- HB500 Brinell cutting edge
- 0.50m3, 0.60m3 and 1.00m3 capacity models
- Weighing option available
- Complete with quick release brackets for telehandlers or loaders
- Bags secured on hangers; remove bags without operator leaving the cab
- Fast filling accurately controlled by two trap doors (controlled from the cab)
- 40 bags can be filled per hour
- Heavy duty design with direct acting hydraulic door control with over pressure protection
- Hydraulic cylinder covered
- Nylon bushes on door pivots eliminates requirements for grease points which can get clogged by material such as sand

Models

| Model | Capacity | Width | Weight |
