

V-CONCEPT FORK MOUNTED SWEEPERS

Overview

The Albutt V-Concept range of sweepers feature an innovative, patented 'V' system, designed to maximise sweeping capabilities and efficiency. The V7 model is designed to give a simple, effective solution for sweeping dry, loose materials such as grain moving onto tougher materials like farmyard manure and slurry. The 'V' system means less rows of bristles are required to give the same performance – ultimately making the V-Concept sweeper a more costs effective solution when it comes to replacing the bristles.

Features

- Innovative patented 'V' design
- Pallet tine mounted as standard
- Optional anti-scattering kit
- Suitable for a variety of applications
- Behind fork heel locking
- Cost effective solution to managing site areas
- Cheap to run and maintain
- Bristles simply slot onto frame – easy to replace

Models

| Model | Width | Bristles |
|---------|--------|--|
| V7-1800 | 1800mm | 3 x straight / 2 x 'V' / 2 x mini rows |
| V7-2400 | 2400mm | 3 x straight / 2 x 'V' / 2 x mini rows |
