

Overview

The Albutt F131 big bale stacker will handle either 3 x mini hesstons (80 x 80) or 2 x hesston bales (120 x 120). The new design features a detachable top frame which allows the stacker to be used to handle single bales, making them easier to handle in low shed roofs. The design features a heavy duty box section frame and 3 x 980mm forged steel tines. Tines are mounted in steel sleeves. Brackets are bolted onto the frame which means they can quickly and simply be changed if machine make is changed in the future.

Features

- Detachable back frame
- Substantial heavy duty box section design
- 3 x 980mm forged steel tines
- Tines mounted in steel bushes
- Available with loader brackets (optional)
- Normally kept in stock
- Designed to carry 2 x hesston bales or 3 x mini hesston bales
- Central support section
