

PALLET FORK POSITIONER

Overview

The Albutt Pallet Fork Positioner allows users to quickly and accurately move pallet forks from the comfort of the cab. By operating a hydraulic service, the forks can move to suit various pallet sizes and loads – ideal for busy yards and construction sites where getting out of the cab can create a health and safety issue. The Albutt Fork Positioner can be bought complete with pallet forks or can take OEM forks for specific machines. The range is made up of 3 models – P410HFP (4.1 tonne capacity), P1200HFP (12 tonne capacity) and P1800HFP (18 tonne capacity). All models are load tested and supplied with the test certificate.
