

## Overview

The Albutt **Site Pro** HD Grapple offers unrivalled strength and durability not previously seen in the European market. The unique design, featuring a complete Hardox body allows the Site Pro to be used in a variety of applications such as Forestry, Waste Handling, Site Clearance, Demolition and Rock/Stone Separation.

## Features

- Unique design shaped for hard raking in both directions, dig up roots, rocks, trees
- Tines manufactured from Hardox steel; 3 times the strength of mild steel
- Tines resistant to breakage and bending
- Official HARDOX IN MY BODY registered product
- Teeth mesh to ensure a high pressure grip of material
- Meshed teeth can push material as small as 75mm; allowing fine raking in both directions
- Move trees, rocks, waste without picking up dirt
- Applications include;
  - Rake and push material
  - Dig out roots and rocks
  - Handle timber, brush, waste
  - Separate loose materials
  - Rake in both directions
  - Ditch clearing
