

## OVERVIEW

The Albutt Bucket Brush can be used to sweep/collect a large variety of materials such as grain, slurry, fertiliser, aggregate, mud etc. The galvanised canopy can be adjusted to suit a variety of bucket types with durable poly bristles fitted as standard. Supplied as standard with mounting brackets, we can supply the brush to fit your existing bucket or fitted to a suitable Albutt bucket. The Albutt Bucket Brush comes with a motor protection valve as standard. A variety of optional extras can be supplied such as a easy stand to keep the brushes secure when not in use.
