

Overview

The Albutt range of JCB Teletruk buckets have been designed beside a Teletruk machine to provide users with the correct attachment for their requirements. The range is made up of the standard bucket, the high tip bucket and the bucket grab. Each model is over engineered to give a heavy duty bucket option for your Teletruk machine. All models incorporate a boron 500 weld on toe plate for added strength across the front edge.

Features

- Boron 500 weld on toe plates
- Available with quick release brackets (class 2 or 3) or changeeze bracket style
- Quick release bracket incorporates unique spring lock system
- Suitable for a variety of applications
- Designed alongside a JCB Teletruk machine
- Crowd/Dump bias options available
