

SINGLE RAM HIGH TIP BUCKETS

Overview

The Albutt single ram range of High Tip Buckets are designed to handle large capacities of dense, sticky materials such as sludgecake and feed. The ram is mounted vertically in the centre of the bucket meaning it operates away from the material being handle. In key stress areas, high tensile steels Hardox and Strenx are used. Compared to other high tip buckets in our product range, the single ram range features a much shorter floor to maintain tear out force when handling dense materials. All models come as standard with a bolt on, reversible toe plate.

Features

- Fitted with long life cutting edge 500 Brinell hardened boron steel
- Extra 500 Brinell Bolt on Toe Plate as standard
- Cradle manufactured from Hardox 500
- Single, vertical mounted ram – operates away from material
- Remote greasing points
- Bucket cushioning
- HARDOX wear pads
- STRENX high tensile steel bucket strengthening
- Over centre valve
- Optional spill guard – see pics

Models

Model	Width	Capacity	Weight
WA105S80HTBL	8'	3.03m3	1220kg
WA112S86HTBL	8'6"	3.17m3	1296kg
WA117S90HTBL	9'	3.30m3	1370kg
