

Overview

The Albutt F470 Bale Grab is a contractor quality, heavy duty bale handler aimed at high intensity users. The side squeeze operation provides a simple yet effective tool for moving both square and round silage bales. Lateral movement of the clamp can be adjusted to allow for the largest possible range whilst keeping the frame width at a minimum. A heavy duty spill frame means a second square bale can be stacked. If the machine has two hydraulic services to the attachment, both width adjustment and the clamp movement operations can be handled from the cab. If the machine only has one hydraulic service, 2 x three way valves on the F470 can be manually operated to switch between width adjustment or clamp movement services.

Features

- Handle square or round bales
- Contractor / heavy user design and build quality
- Handle wrapped silage or straw bales
- Opens from 700mm to 2450mm
- Lift capacity 2000kgs
- Weight 600kgs
- Spill frame allows second square bale to be carried
- Plastic bushes
- Fitted with lateral adjustment for the largest possible range whilst keeping frame width at a minimum
- 2 x Three way valves select between clamp movement or width adjustment (if machine only has one hydraulic service)

Models

Model	Open	Closed	Weight	Capacity
F470	2450mm	700mm	600 kg	2000 kg
